RPSC Programmer 2024 — Paper 1

Rajasthan Public Service Commission · Programmer (Paper 1)

100 questions · 100 marks · 2 sections

Answer Key

Q1–40 · Section A · Reasoning, Numerical Analysis & Current Affairs · 40 questions

Q41–100 · Section B · DBMS, Data Communication & Computer Fundamentals · 60 questions

Ye paper official exam ke baad public hui question paper aur answer key se taiyar kiya gaya hai. Practice ke liye print karein.

Section A · Reasoning, Numerical Analysis & Current Affairs

Questions 1–40

Q1. (3) R

Q2. (4) DNPAU

Q3. (1) 324

Q4. (1) Both the arguments I & II are strong

Q5. (3) 8

Q6. (1) Both statements (i) and (ii) together are sufficient to answer the question but neither statement alone is sufficient

Q7. (2) 32

Q8. (4) ÷ and ×

Q9. (2) If statement (i) and (ii) both are not sufficient to answer the question. More data (information) are needed to answer the question

Q10. (1) Friday

Q11. (4) Only conclusion (i) follows

Q12. (2) Statements I and III

Q13. (1) 2:1

Q14. (1) √3

Q15. (2) 7 to 17

Q16. (1) Near the South Pole

Q17. (2) Norway

Q18. (2) Subrahmanyam Jaishankar

Q19. (3) Gujarat

Q20. (1) Tripura

Q21. (3) Sojat Mehandi

Q22. (2) 26th November

Q23. (4) Tariq Mansoor

Q24. (2) Four

Q25. (1) Banswara

Q26. (2) Golden Beach, Odisha

Q27. (2) 2010

Q28. (2) 157

Q29. (1) PRAGATI

Q30. (4) Both the statements (I) and (II) are true

Q31. (2) Bundi

Q32. (1) Learn, Earn And Progress

Q33. (4) Tele-MANAS

Q34. (2) Section 173

Q35. (2) Wolframite

Q36. (3) Both the statements (A) and (B) are correct

Q37. (4) Jobner (Jaipur)

Q38. (1) Nidhi Saxena

Q39. (2) A-(i), B-(ii), C-(iii), D-(iv)

Q40. (1) Ajmer

Section B · DBMS, Data Communication & Computer Fundamentals

Questions 41–100

Q41. (4) Transport layer

Q42. (4) 10

Q43. (2) 24 bits are used for network portion

Q44. (2) 172.16.123.208

Q45. (4) I and II both

Q46. (2) Multivalued attribute

Q47. (1) 16 bits

Q48. (3) 6

Q49. (1) using the More Fragments and Fragment Offset Fields

Q50. (1) Reliability

Q51. (1) maps a domain name to an IP address

Q52. (1) Degree of the relation

Q53. (4) 600

Q54. (2) Dependency preserving and lossless join

Q55. (2) I and III

Q56. (1) 1001100

Q57. (1) The Set – Difference Operation

Q58. (2) map IP address to domain name, PTR

Q59. (4) The relation is in BCNF because all determinants are super keys.

Q60. (1) make the data look random

Q61. (1) $G \times e^{-G}$

Q62. (4) Both 1 & 2

Q63. (4) Natural join operation

Q64. (4) BCNF

Q65. (4) SMTP

Q66. (3) 6

Q67. (3) 255.255.64.0

Q68. (3) Secondary Indices

Q69. (3) AJ

Q70. (2) 5000

Q71. (4) CSMA/CA

Q72. (1) To create multiple zones of trust

Q73. (1) One to one relationship

Q74. (3) Database approach doesn't support data independence between data and programs.

Q75. (4) Entity integrity constraints

Q76. (1) b, d

Q77. (1) 2046

Q78. (2) $p \times (1 - p)^{n-1}$

Q79. (2) A virtual table created by querying one or more tables

Q80. (4) establish connection and synchronize sequence numbers

Q81. (2) Seek time + rotational delay + transfer time

Q82. (1) Data Manipulation Language (DML)

Q83. (2) finding the MAC address that corresponds to an IP address

Q84. (4) Conceptual Schema

Q85. (1) CREATE TRIGGER

Q86. (2) Analysis, Undo, Redo

Q87. (2) DHCP

Q88. (3) 13 bits

Q89. (2) 4

Q90. (1) View

Q91. (4) 12

Q92. (2) 48

Q93. (1) Wi-Fi

Q94. (4) Network

Q95. (3) SELECT INTO

Q96. (4) Separate physical paths are allocated for each channel

Q97. (2) Congestion control

Q98. (2) 125

Q99. (2) Database

Q100. (1) Bit-by-bit delivery
